In accordance with 40 CFR 745.227 and OAC 252:110, a post-abatement report must be completed by the Supervisor or Project Designer after completion of this abatement project. It should be maintained by the certified firm or the individual who prepared the report for no fewer than 3 years and should include the following items:

- (1) start and completion dates of abatement
- (2) name and address of each certified firm conducting the abatement and the name of each supervisor assigned to the abatement project
- (3) occupant protection plan
- (4) name, address, and signature of each certified risk assessor or inspector conducting clearance sampling and the date of clearance testing
- (5) results of clearance testing and all soil analyses (if applicable) and the name of each recognized laboratory that conducted the analyses
- (6) a detailed written description of the abatement, including abatement methods used, locations of rooms and/or components where abatement occurred, reason for selecting particular abatement methods for each component, and any suggested monitoring of encapsulants or enclosures

Statement of Understanding

I hereby certify under penalty of law that this notification and any attachments contain neither willful nor negligent misrepresentation or falsification and that all information is true, accurate, and complete. I understand that any misrepresentation or falsification may result in revocation or suspension of any LBP certification as well as civil and/or criminal sanctions.
