252:302-9-33. Sample storage for pickup [AMENDED]

**SUMMARY:**

The gist of these rules and the underlying reason for this rulemaking is to make the Laboratory Accreditation Rules internally consistent, to update accreditation requirements to reflect current EPA standards for analysis, and to make program fees more closely approximate program costs for accreditation.

The Department is proposing to amend 252:302-1-4, Definitions, to correct typographical errors, and by inclusion of new definitions for the terms finding and critical finding. Additionally, the term interim accreditation is clarified.

The Department is proposing to amend 252:302-1-5, Fees, adding a new fee to recover the cost for assessors in performing on-site evaluations. The gist of this rule is to more accurately reflect the Department's full cost for performing laboratory accreditation and reduce reliance on State appropriated funds.

The Department is proposing, in 252:302-3-4 and thereafter throughout Chapter 302, to delete the word "inspection" and substitute the term "evaluation." Additionally, the language for conducting evaluations is clarified.

The Department is proposing to amend 252:302-5-2, Laboratory technicians, to delete redundant language and broaden the educational and training requirements of the laboratory technician.

The Department is proposing to amend 252:302-5-6, On-site inspections, to clarify the circumstances and frequency for conducting on-site evaluations.

The Department is proposing to amend 252:302-7-1, Participation required, by adding a requirement that Proficiency Tests must be provided by a National Environmental Laboratory Accreditation Program proficiency testing provider.

The Department is proposing to amend 252:302-9-25, Methodology incorporated by reference, to incorporate the latest changes to EPA Test Procedures for the Analysis of Pollutants. A significant result of the update to EPA Test Procedures for the Analysis of Pollutants is amendment of the procedure for the determination of the Method Detection Limit (MDL), which will apply to all permittees and accredited laboratories.

The Department is proposing to amend 252:302-9-33, Sample storage for pickup, to include annual verification of all thermometers using a recognized national metrology institute such as National Institute of Standard and Technology (NIST). This change is consistent with EPA required test procedures.

**AUTHORITY:**

Environmental Quality Board; 27A O.S., Sections 2-2-101, 2-2-201, and 2-4-302.

Water Quality Advisory Management Council; 27A O.S., Sections 2-2-201 and 2-5-107.
