Also, modifications are proposed to OAC 252:100-1-4, relating to units, abbreviations, and acronyms, to correct scrivener's errors that inadvertently resulted in removal of superscripts and subscripts from the terms in subsection (a) of that Section. Rule Title: Incorporation By Reference Rule Cite: OAC 252:100-2, Appendix Q Brief Description: The Department is proposing to clarify language in Subchapter 2, Incorporation By Reference, and to update OAC 252:100, Appendix Q, Incorporation By Reference, to incorporate the latest changes to U.S. Environmental Protection Agency regulations. Included are changes or additions to 40 CFR Part 61, New Source Performance Standards (NSPS), and Part 63, National Emissions Standards for Hazardous Air Pollutants (NESHAP).

Rule Title: Air Quality Standards and Increments Rule Cite: OAC 252:100-3 Brief Description: The Department is proposing to modify Subchapter 3, Air Quality Standards and Increments, by the addition of the annual and 24-hour PM_{2.5} increments to OAC 252:100-3-4, Significant deterioration increments. In addition, the Department is considering an increase to permit application fees for both minor facilities and Part 70 sources by amending OAC 252:100-7, Part 2 and OAC 252:100-8, Part 3. The changes are designed to offset legislative budgetary shortfalls and cover current and anticipated staffing requirements in administering the Department's air pollution control programs. The Department is proposing modifications to Parts 7 and 9 of Subchapter 8 to implement the New Source Review program (PSD and Nonattainment NSR) for the fine particulate matter (PM-2.5) National Ambient Air Quality Standards (NAAQS). The proposed rule changes will establish provisions for a major source threshold, significant emissions rate, offset ratios for PM-2.5 NAAQS, and interpollutant trading for offsets that are consistent with those in the federal regulations. Rule Title: Allowable Particulate Matter Emission Rate for Incinerators Rule Cite: Appendix A Brief Description: The Department is proposing to amend Appendix A to correct inaccuracies.
