EPA Approved, FEM Class III, Continuous PM 2.5 Analyzer (See Attached Specs)

Freight Terms: FOB DEST
Ship Via: COMMON

Justification
Several of our Continuous PM 2.5 analyzers (TEI 1400ab TEOM / 8500b FDMS) are over 10 years old and we need to start upgrading and replacing the oldest ones. Our immediate needs is for 2 analyzers which will replace the aging equipment at our sites in Seiling and Lawton. These sites have suffered extensive downtime in recent years (especially during hot summers) and need analyzers with a smaller footprint. Data from these sites is critical to our Health Advisory Program for PM 2.5 and is submitted to the AIRNow National website every hour. It is also submitted to the EPA and used in health studies.
