

Future

G O A L S

The Oklahoma Department of Environmental Quality is taking aggressive steps to repair the environmental damage of the past and to protect our environment for the future. Today, we know the land itself is one of the great resources of Oklahoma and the DEQ is determined to restore and protect it.

Land restoration will continue to be a top priority for many years. The DEQ has pioneered the use of materials recovered from solid waste – sewage sludge, wood chips, yard waste, and paper mill sludge to restore land to productive use that was damaged by past industrial and mining practices.

The DEQ Air Quality Staff will continue to work with industrial, municipal and regional partners to maintain healthy air for the citizens of our state. Keeping Oklahoma off of the U.S. Environmental Protection Agency's non-attainment list will be a top priority.

Keeping our State's water clean will involve promoting pollution prevention practices and partnering with public water supplies and wastewater treatment plants, providing our customers with the latest technical information.

We pledge to be sensitive to our "customers" needs and will partner with them to develop innovative solutions to the challenges of environmental protection without compromising our quality of life.

Protecting our ENVIRONMENT

It's everyone's job

Protecting the environment is the joint responsibility of the Oklahoma Department of Environmental Quality (DEQ) and all Oklahomans.

The DEQ was created by the Oklahoma Legislature July 1, 1993 after many years of study. It was determined that the best way to protect the environment and public health was to create a stand-alone agency to address air, water and waste issues.

DEQ employees work in the divisions of Air Quality, Customer Services, Environmental Complaints and Local Services, Land Protection, Water Quality and Administration. This staff includes environmental specialists, geologists, hydrologists, chemists, engineers, lawyers and support personnel.

The DEQ also has local offices across the state with a central office in downtown Oklahoma City.

Responsibilities

- **Enforce state and federal environmental laws, including:**
 - Clean Air Act
 - Clean Water Act
 - National Pollutant Discharge Elimination System
 - Oklahoma Solid Waste Management Act
 - Resource Conservation and Recovery Act (RCRA)
 - Safe Drinking Water Act
 - Superfund Amendments and Title III Reauthorization Act (SARA)
 - Oklahoma Radiation Management Act
- **Be responsive to environmental complaints and operate a 24 hour toll-free hotline.**
- **Write and issue permits for:**
 - Air pollution control construction and operation
 - Construction of public drinking water supply systems
 - Hazardous waste facilities
 - Radioactive materials License
 - Solid waste landfills
 - Municipal and industrial wastewater treatment plants
 - Stormwater runoff

Accomplishments

- Established a 24 hour hotline to be responsive to environmental complaints.
- Established a nationally recognized complaints resolution system.
- Developed a program to assist citizens with on-site wastewater and disposal systems (septic systems)
- Developed a Customer Services Division to assist municipalities and industries through the maze of the permit process
- Developed a tier system to streamline the permitting process to speed up the review time and allow permits to be reviewed according to risk.
- Is a national leader in the development of programs to dispose of and reuse old tires
- Developed a program to clean up historical pollution programs and aggressively working on land restoration
