Legend of Potential Sources

Source ID	Source Description
2	Acid Mine Drainage
4	Animal Feeding Operations (NPS)
8	Atmospheric Depositon - Acidity
10	Atmospheric Deposition - Toxics
16	Cercla NPL (Superfund) Sites
21	Clean Sediments
33	Discharges from Biosolids (SLUDGE) Storage, Application or Disposal
34	Discharges from Municipal Separate Storm Sewer Systems (MS4)
38	Dredging (E.g., for Navigation Channels)
42	Flow Alterations from Water Diversions
46	Grazing in Riparian or Shoreline Zones
49	Highway/Road/Bridge Runoff (Non-construction Related)
56	Impacts from Abandoned Mine Lands (Inactive)
58	Impacts from Hydrostructure Flow Regulation/Modification
59	Impacts from Land Application of Wastes
62	Industrial Point Source Discharge
66	Irrigated Crop Production
68	Land Application of Wastewater Biosolids (Non-agricultural)
69	Landfills
70	Leaking Underground Storage Tanks
82	Mine Tailings
84	Municipal (Urbanized High Density Area)
85	Municipal Point Source Discharges
87	Non-irrigated Crop Production
92	On-site Treatment Systems (Septic Systems and Similar Decentralized Systems)
97	Other Spill Related Impacts
100	Permitted Runoff from Confined Animal Feeding Operations (CAFOs)
102	Petroleum/natural Gas Activities (Legacy)
108	Rangeland Grazing
110	Releases from Waste Sites or Dumps
111	Residential Districts
119	Silviculture Harvesting
124	Spills from Trucks or Trains
127	Surface Mining
128	Total Retention Domestic Sewage Lagoons
133	Wastes from Pets
136	Wildlife Other than Waterfowl
140	Source Unknown
146	Sources Outside State Jurisdiction or Borders
155	Natural Sources
156	Agriculture

Prioritization of TMDL Development

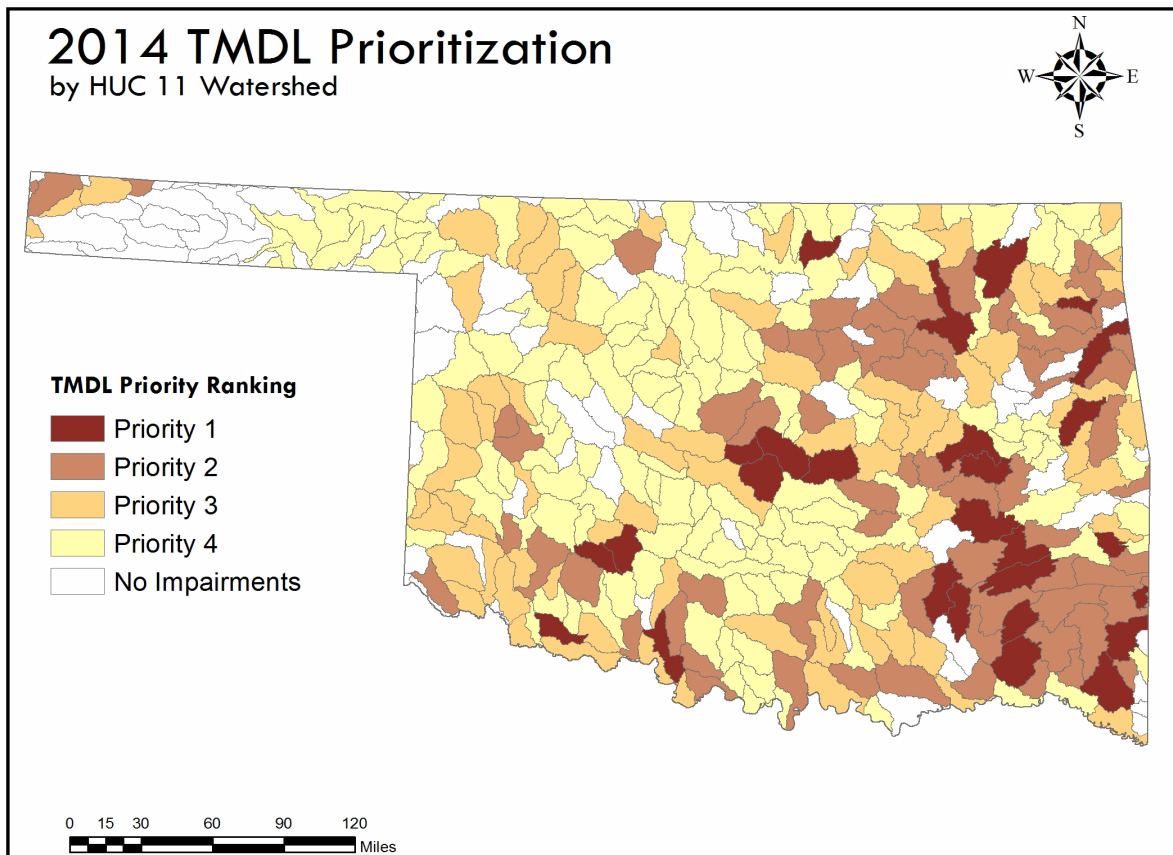

A priority ranking for TMDL development has been established for each impaired HUC 11 watershed in the state using the procedure outlined in the 2012 Continuing Planning Process (pp. 139-140). The TMDL prioritization point totals calculated for each watershed were broken down into the following four priority levels:

- Priority 1 watersheds - above the 90th percentile (27 watersheds)
- Priority 2 watersheds - 70th to 90th percentile (66 watersheds)
- Priority 3 watersheds - 40th to 70th percentile (78 watersheds)
- Priority 4 watersheds - below the 40th percentile (141 watersheds)

Each waterbody on the 2014 303(d) list has been assigned a potential date of TMDL development based on the priority level for the corresponding HUC 11 watershed.

Priority 1 watersheds are targeted for TMDL development within the next two years.

91 HUC11 watersheds contained no impaired waterbodies and were not included in the prioritization process.
