

STEVEN A. THOMPSON
Executive Director

OKLAHOMA DEPARTMENT OF ENVIRONMENTAL QUALITY

BRAD HENRY
Governor

October 26, 2009

Mr. Peter Leone
Toshiba America Information Systems Inc.
9740 Irvine Boulevard
Irvine, CA 92618-1697

Subject: Toshiba Inc. E-Waste Compliance Plan

Dear Mr. Leone:

On October 22, 2009 the Oklahoma Department of Environmental Quality (DEQ) received your revised recovery plan. The DEQ has reviewed your recovery plan as required by 27A O.S. § 2-11-605 of the Oklahoma Computer Equipment Recovery Act. The DEQ's review of the recovery plan was to verify your compliance with the Act. After detailed review it has been determined that your plan is compliant with Act. Thank you for your efforts as we continue to work towards a clean and prosperous Oklahoma.

If you have additional questions, please contact me at (405) 702-5218.

Sincerely,

A handwritten signature in black ink, appearing to read "Melissa Adler-McKibben".

Melissa Adler-McKibben
Environmental Programs Specialist
Land Protection Division

Windows®. Life without Walls™. Toshiba recommends Windows 7.

we care about the earth. green programs

Toshiba is proud to say we're not only leading innovation in mobile technology, but leading the charge to preserve the air we breathe, the water we drink and the ground we walk on.

When it comes to building our award-winning products, we believe less is more. So we minimize waste and use recycled materials wherever we can, while constantly looking for ways to reduce energy consumption. Our own recycling programs keep discarded technology from fouling the soil and atmosphere, as does our devotion to worldwide environmental initiatives. Plus, we check to see that the people who make the materials that go into our products follow earth-friendly practices just as we do so we all can enjoy mobile computing amid a cleaner, more sustainable "global village."

No, it isn't always easy being green. But it sure is the right thing to do.

Laptop Recycling and Trade-In

Of course we'd like you to buy a new Toshiba laptop PC. But we also want to help you retire your old technology the right way and maybe get back some green as you go green. So if it still has trade-in value, we'll mail you a credit when you send us your old working laptop. And even if it isn't working, we can see that it's recycled properly. That goes to show you how banding together for the good of the environment can be good for your pocket book too.

Regulatory Compliance

A leading global citizen, Toshiba products are compatible with the strict standards set by these world-recognized directives:

WEEE (Waste from Electrical and Electronic Equipment) Protects the environment by promoting the reuse, recycling and recovery of electronic materials.

RoHS (Restriction on Hazardous Substance Standard) Seeks to reduce the use of manufacturing substances that harm human health or the environment.

The products we take back for trade-in and recycling, including covered electronic devices, will not be disposed of in landfills or transferred to computer equipment recycling facilities that dispose of covered devices in landfills other than necessary incidental despoil in de minimis amounts.

The result? We've kept tons of toxic chemicals and other substances out of the ecosystem.

Factor T

A very odd name for a very smart idea, Factor T is how we've gotten green down to a science. In fact Toshiba has created a mathematical formula for balancing the consumer value of our products with their environmental impact. Our goal is to double our eco-efficiency by 2010. And we're well on our way.

Green Procurement

Thanks to stringent procurement standards launched in 2000, Toshiba technology is green from the ground up. Our suppliers must participate in a stringent, 22-
