

Systemax Manufacturing Inc (“SMI”) submits the following as SMI’s recovery plan under Oklahoma’s Senate Bill Number 1631: “Oklahoma Computer Equipment Recovery Act”;

To meet the requirements of the law, SMI shall:

- A. Take responsibility for Systemax and Ultra branded covered computer equipment discarded by consumers in Oklahoma at no cost to the consumer.
- B. This will be accomplished through a mail back program as allowed under the “Oklahoma Computer Equipment Recovery Act”.
- C. Consumers in Oklahoma shall access SMI’s program through their website (www.systemaxpc.com). Information on how and where to return covered devices is available on the site. A consumer toll-free number is provided on the website should the consumer have any additional questions regarding SMI’s commitment to environmentally sound management of the electronic materials.
- D. SMI will implement this plan and use our recycling partner Sims Recycling Solutions (Sims). SMI has a long-standing relationship with Sims for recycling unwanted electronics in multiple states around the country. Sims has 12 facilities around the country. All facilities are ISO 9001, 14001 and 18001 certified. Sims’ North American facilities are going through Responsible Recycling for Electronics (R2) certification and all 12 facilities are schedule to be certified by May 2011. Sims or Systemax will not dispose of covered devices in landfills other than necessary for incidental disposal in de minimis amounts. Under these certifications, the citizens of Oklahoma can be assured their unwanted electronics are handled in the most environmentally sensitive way.
- E. Through the systemaxpc.com website, consumers will be informed of the laws governing the recycling and reuse of unwanted Systemax and Ultra branded computer equipment and how to comply with the requirements of the law. The website contains a toll-free phone number (800-262-6622) consumers can call to answer any questions they may have.
