

**Oklahoma Computer Recycling Notification and Recovery Plan for
Research In Motion Limited (RIM)
03/15/11**

Research In Motion Limited (RIM) is implementing a recovery plan that will come into effect on the commercial launch date for the BlackBerry® PlayBook™ tablet (the covered device). The PlayBook launch date has not yet been announced by RIM.

RIM will provide for the collection of its end-of-life covered devices through a convenient mail-back program that will be available to our consumers at no charge. Consumers may log on to www.blackberry.com/recycling to print off a prepaid postage label to affix to their package. *(Please note this website will not be live until the commercial launch date for PlayBook).* The consumer may then take their package to the nearest post office to be mailed to a recycling facility.

RIM will be working with a certified recycler to collect and recycle RIM's end-of-life covered devices. The recycler planned for this engagement is currently certified under the e-Stewards certification program and is working through the final stages of becoming certified under the R2 certification program. As such, the recycler planned for this engagement follows sound recycling and recovery practices as required by these certification programs.

RIM will be referencing its recycling program, including the website where further information can be obtained, in the Safety Information Booklet that is shipped with each covered device. A link to the website will also be provided in the PlayBook section of www.blackberry.com.

RIM will not dispose of covered devices in landfills or transfer covered devices to recycling facilities that dispose of covered devices in landfills, other than necessary incidental disposal in de minimis amounts.

If there are any questions regarding RIM's recovery plan, please feel free to contact Julie Takanashi, Product Sustainability Analyst, at jtakanashi@rim.com or at 519-888-7465 ext 78569.

Sincerely,

A handwritten signature in blue ink that reads 'David J. Dougall'.
